

IMDB: MOVIES AND TV SHOWS

IMDb (Internet Movie Database) is an online database of information related to films, TV series, podcasts, video games, cast, production crew, ratings, etc.

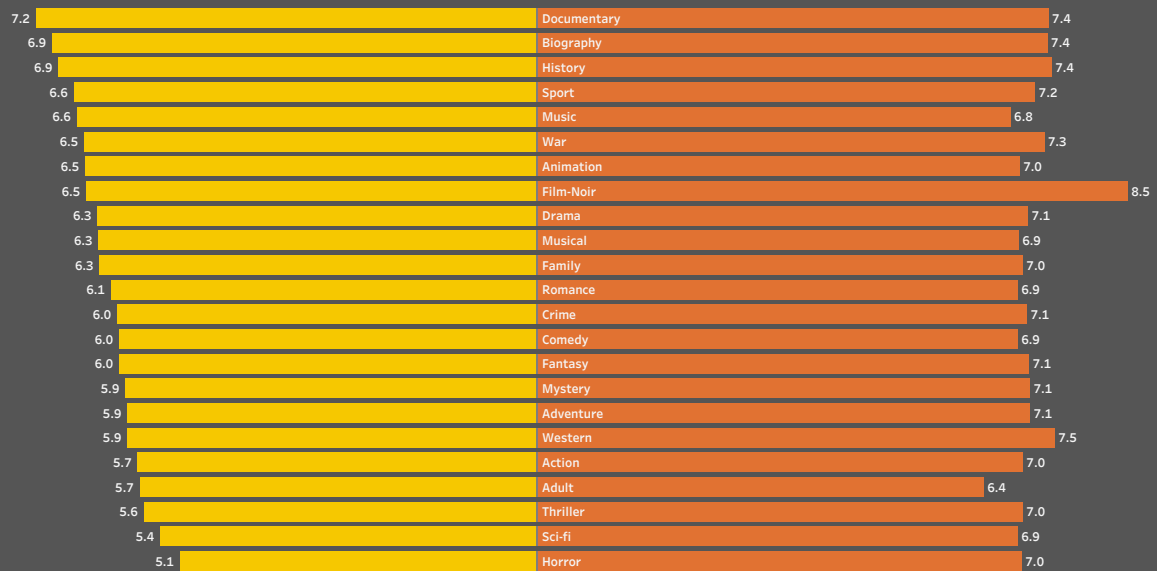

This visualisation focuses on movies and TV shows. Here are some findings:

- The peak of movie and TV show production was in 2015-2017.
- The steady increase of production started around the 50s for movies and around the 80s for TV shows.
- The first major decrease in production happened in 2006-2009. The second one started in 2020 and is still ongoing.
- Documentary, biography and history are among the highest rated genres, whereas horror, sci-fi and adult are the least rated ones.
- The most numerous genres of all time are drama, comedy and documentary, however the popularity of certain genres varies throughout the decades.
